

Project:

- This website is to demonstrate a software engineer's skillset to employers for job hunting and networking purposes. It will showcase the projects the client has completed and allow employers to contact the individual through the contact form. The website will allow users to download the client's resume as well review his social media platforms such as YouTube, LinkedIn and Github.

Role:

- Developer and UX Designer

Tools:

- Visual Studio Code
- Procreate
- Figma

Colors:

#F3C150

#000

#33A0E1

Hello! I'm George.

An Alumni of Pace University on the Westchester campus. He recently graduated from Seidenberg School of Computer Science, obtaining a MS in Computer Science. George is currently seeking a position at a company where he can fulfill he's dream of software development. Idea/Concept development has always been a passion for George. It is the ability to create something that George views as, a gift that keeps on giving. This notion is the drive that forces George to pursue a bright and successful future in software development.
